

PENNSYLVANIA EMPLOYERS COALITION

INSURING STABILITY FOR STAFFING FIRMS

PEC PROGRAM: NO EXCLUDED CLASS CODES!

PEC doesn't turn away any organization due to a predetermined list of class codes. PEC provides an alternative market solution specifically designed for staffing organizations, which come with a variety of risks and exposures.

Many insurance carriers will turn away existing clients and prospects simply because they've determined that they fall "outside the box" and in a class code that the carrier has deemed to be too risky. In contrast, PEC individually underwrites each account to take into consideration all aspects of the organization, including specific safety controls and historical performance to make underwriting decisions. PEC is the workers' compensation insurance option that staffing firms can count on to protect their workers and drive the rewards of profitable performance back to the organization.

Innovative Solutions. Traditional Values.
